CHALLENGE

The Strong Racks Challenge was developed as a way to explain the numerous features of our Strong Racks Commercial Grade (High Capacity) Storage System.

You can download this information as a comparison to other products on the market today. While we don't make any claims to any other storage companies products, we do provide you with insights on our construction, features and benefits.

Please feel free to use this document to identify if our features meet or exceed your needs. The Strong Racks Challenge identifies 10 top features to point out:

A Rack Is Not Just A Rack!

4'x8' 750 Pound Ceiling Storage Unit

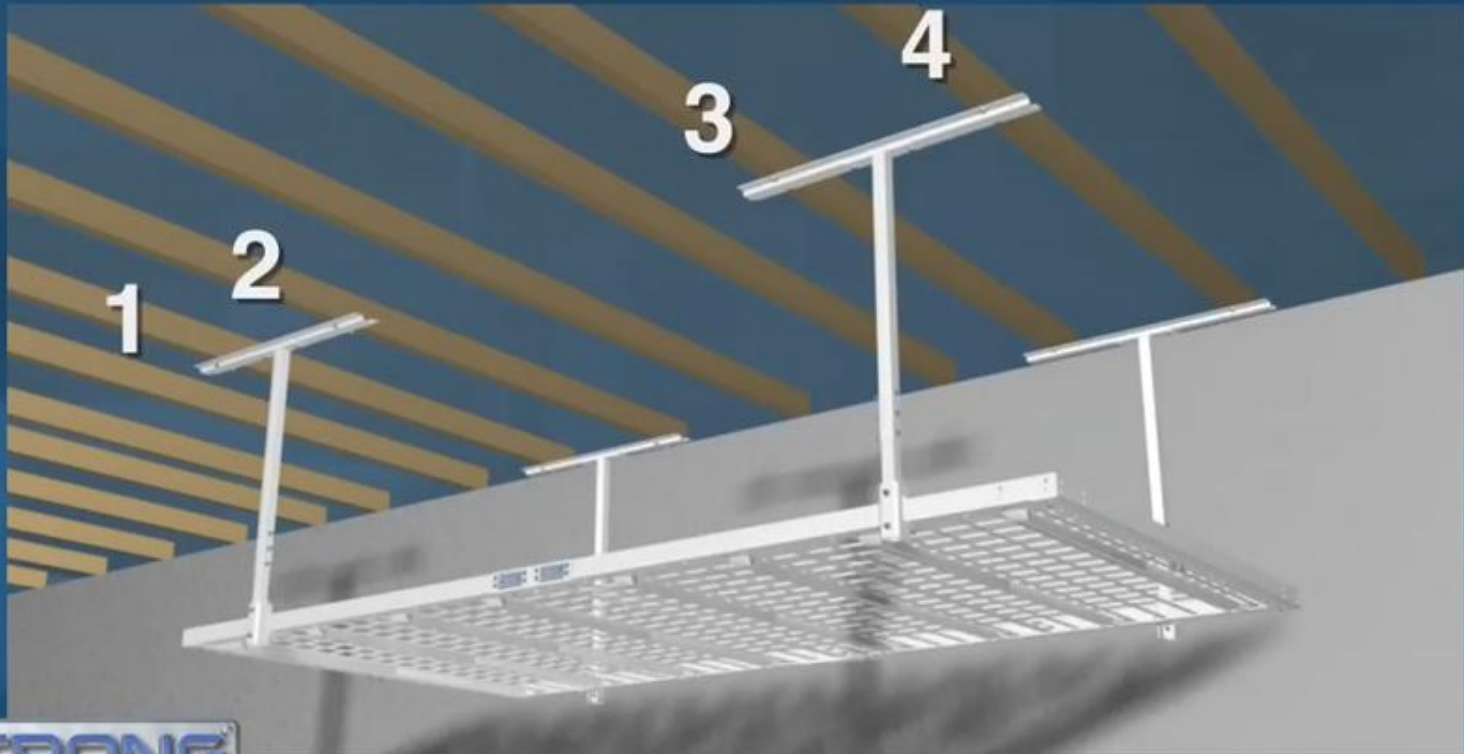

A 4'x8' ceiling storage unit is shown, featuring a grid of dark grey bins. The unit is supported by a metal frame with vertical posts and horizontal bars. A central logo reads "STRONG RACKS" in blue, stylized, 3D block letters on a silver background. The background is a blue gradient with horizontal lines.

***Strongest & Safest
Ceiling Storage Systems***

US Patent # 8,511,486

Feature 1: Mounts To 4 Ceiling Trusses

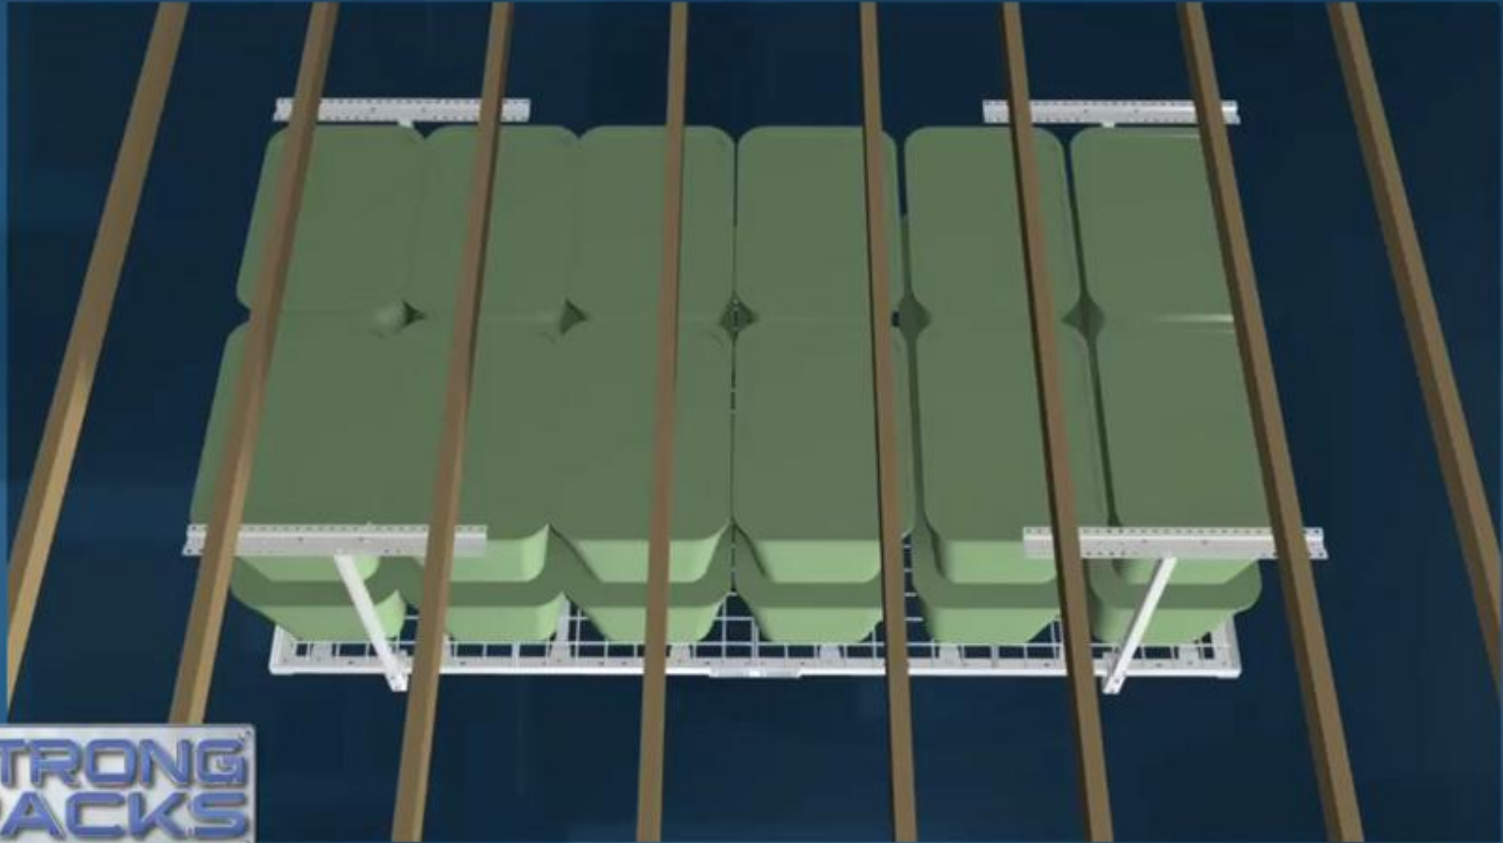

4'x8' 750 Pound Ceiling Storage Unit

Feature 1: Mounts To 4 Ceiling Trusses

Our 26 inch mounting track can span two joists and is secured with four, 3" steel lag screws

4'x8' 750 Pound Ceiling Storage Unit

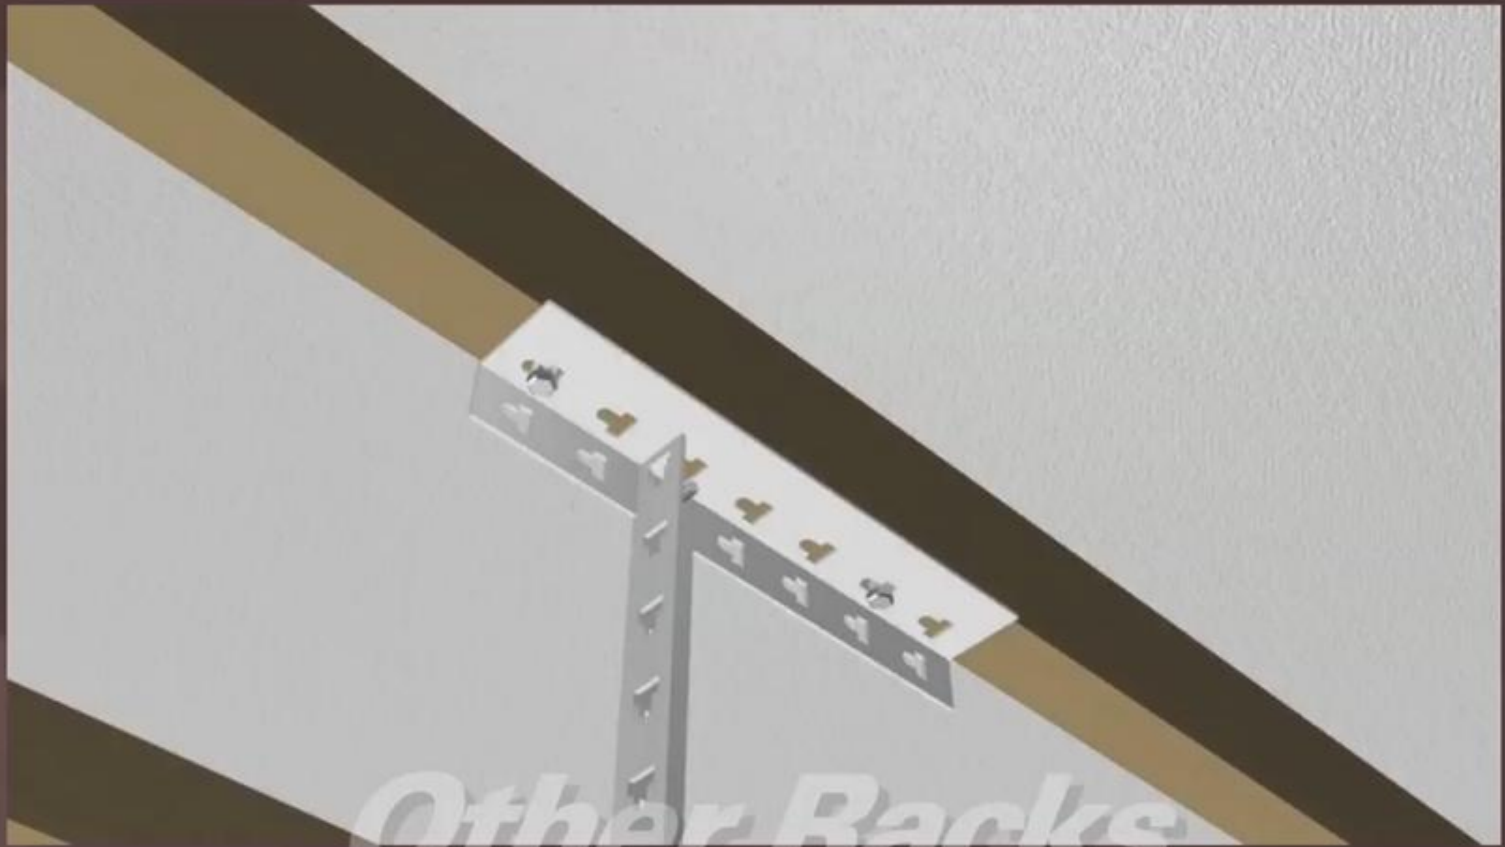

It does not matter if your ceiling support system is 16 inches or 24 inches apart. Our system works.

Other Racks

Contact the company you are comparing us to and ask how many ceiling joists they secure their system in?

Other Racks

Contact the company you are comparing us to and ask how many trusses they secure their system in?

4'x8' 750 Pound Ceiling
Storage Unit

Feature 2: Mounting Track

4'x8' 750 Pound Ceiling Storage Unit

Exclusive

Feature 2: Mounting Track

Our steel track is 11 gauge steel. It also has welded nuts inside the track for easy installation.

4'x8' 750 Pound Ceiling
Storage Unit

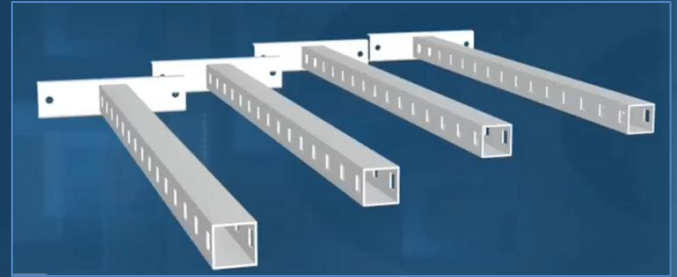

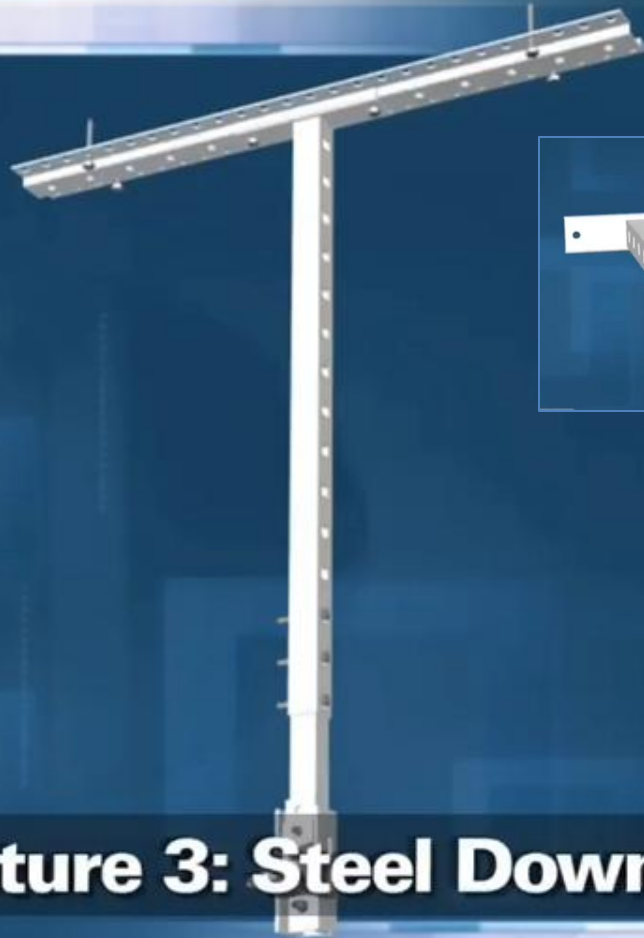

Rotates 90 Degrees

Rotates to ensure 2 joist mounting per assembly.

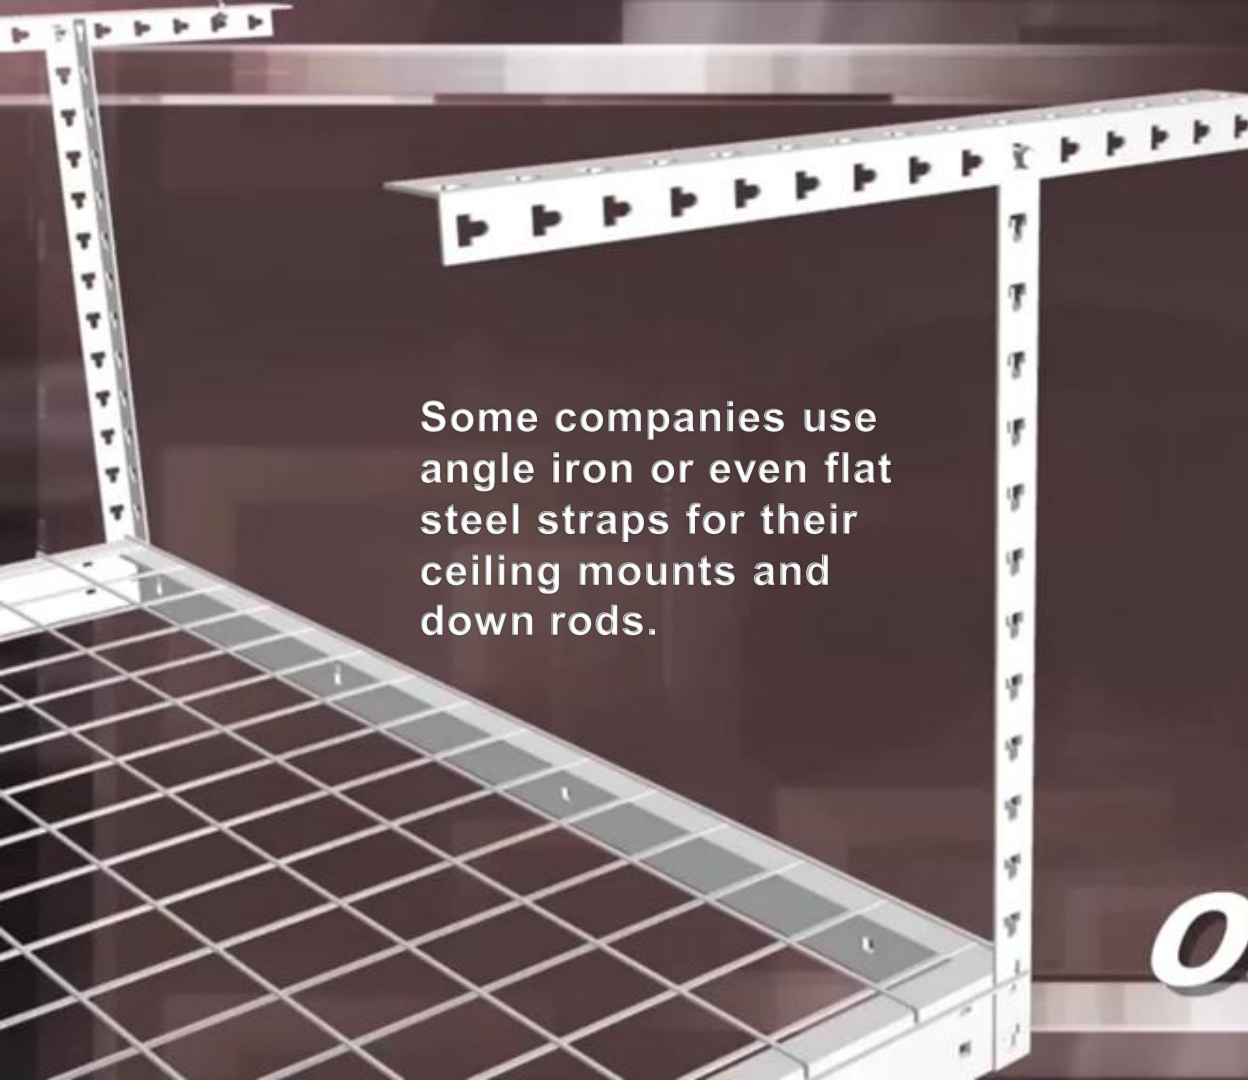

Other Racks

Adjusts from 27.5" to 41.5"

Feature 3: Steel Down Tubes

Some companies use angle iron or even flat steel straps for their ceiling mounts and down rods.

4'x8' 750 Pound Ceiling Storage Unit

US Patent # 8,511,486

Multi-use Rail Bracket

Exclusive

Feature 4: Rail Bracket

Our patented Rail Brackets has three primary uses.

1. It reduces any flex the rails might have.
2. It secures the mounting system to the rails.
3. It allows for installation into wall studs for additional capacity and strength.

COMMERCIAL-GRADE HOME STORAGE

Exclusive

Exclusive

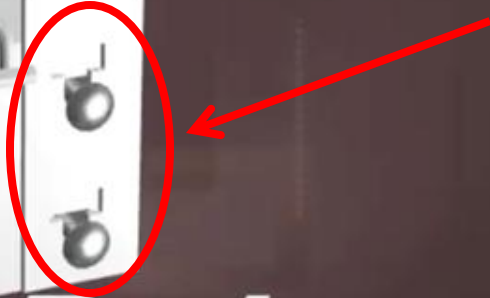

Wall Stud Attachment for extra stability, strength and capacity.

COMMERCIAL GRADE HOME STORAGE

Some companies use “gravity drop pins” to secure their down rods into their rail system.

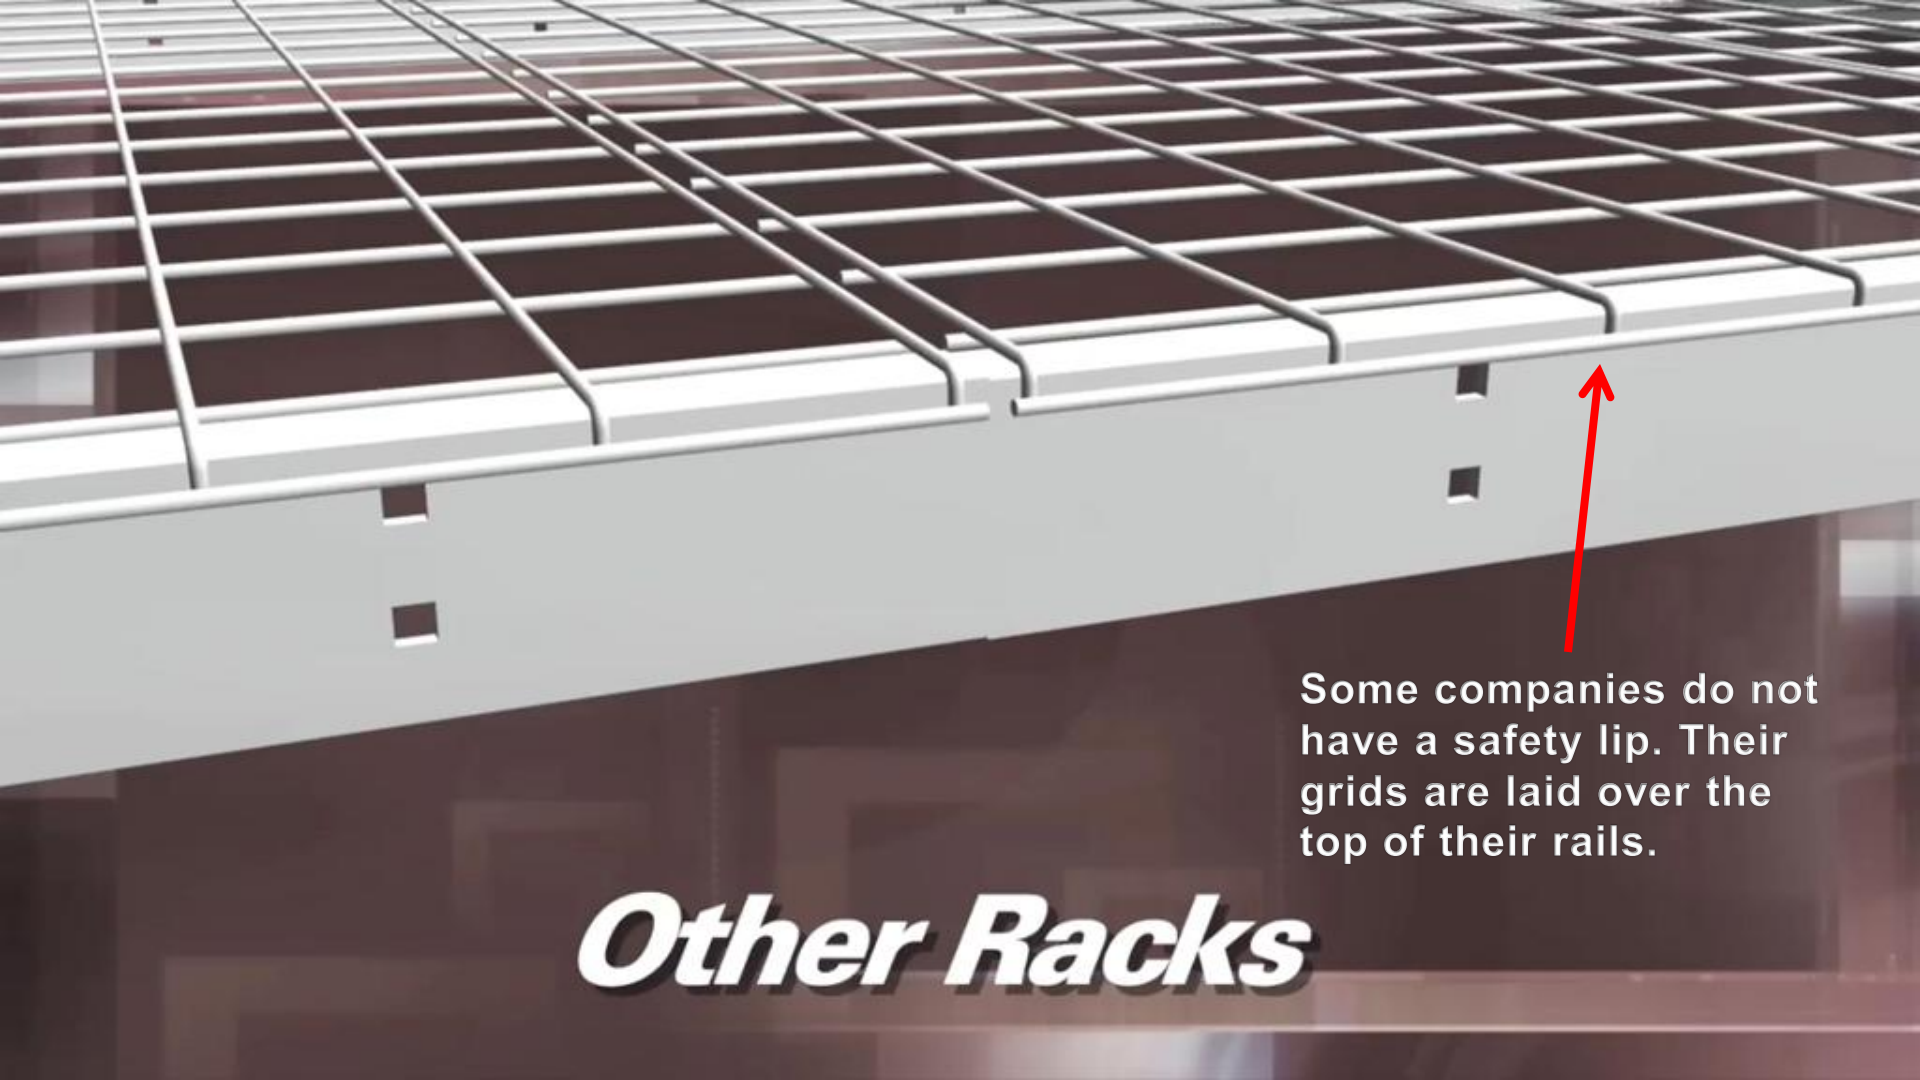

Other Racks

A close-up photograph of a silver metal wire rack. The focus is on the top edge of the grid, which features a 2-inch safety lip. Three blue arrows point from the text 'Feature 5: 2 Inch Safety Lip' at the bottom to the lip on three different sections of the rack. A white box with the text 'Helps Secure Items' is positioned at the top center. The background is a blurred blue.

Helps Secure Items

COMMERCIAL GRADE HOME STORAGE

Feature 5: 2 Inch Safety Lip

Some companies do not have a safety lip. Their grids are laid over the top of their rails.

Other Racks

Feature 6: Secure Grid System

Some companies do not
bolt their grids into
place. They are held in
place by gravity

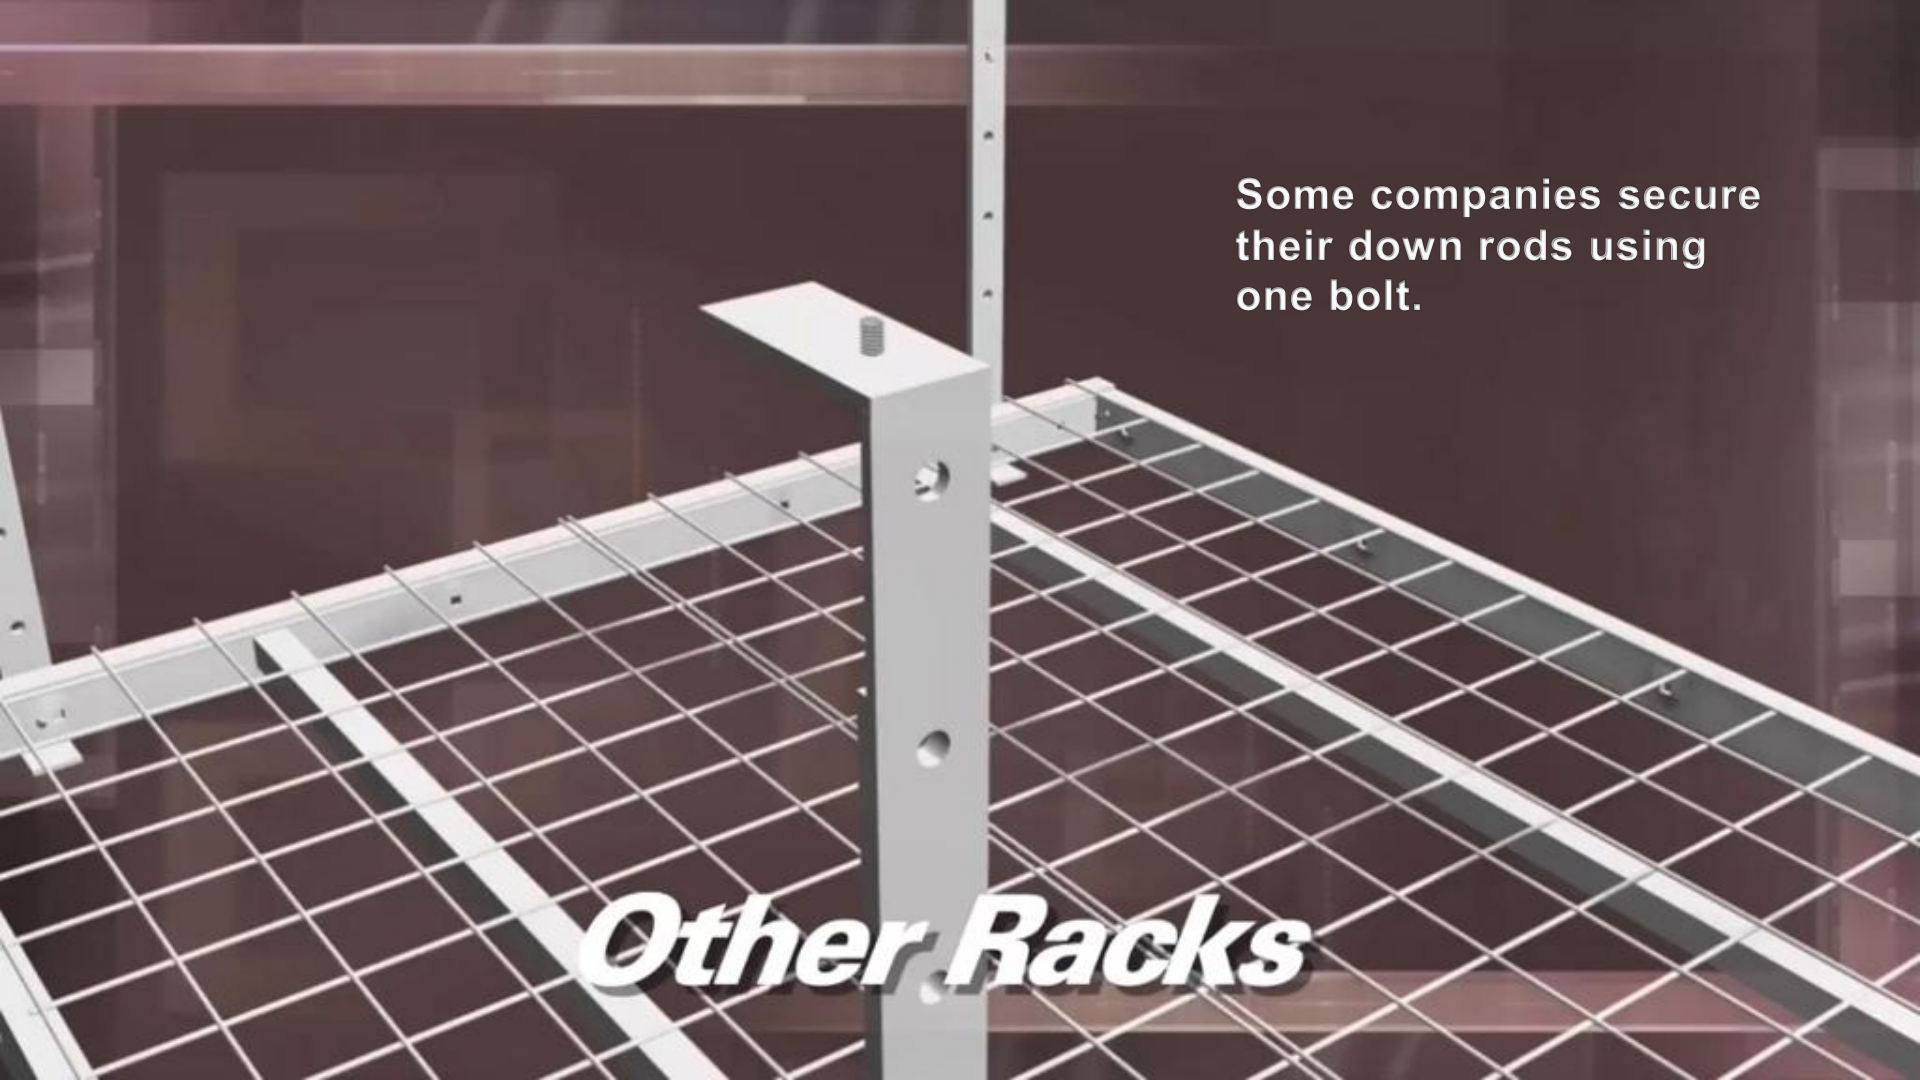

Other Racks

13 Pieces of Hardware

Feature 7: Durable Ceiling Assembly

Some companies secure their down rods using one bolt.

COMMERCIAL GRADE HOME STORAGE

Feature 8: Highest Weight Capacity

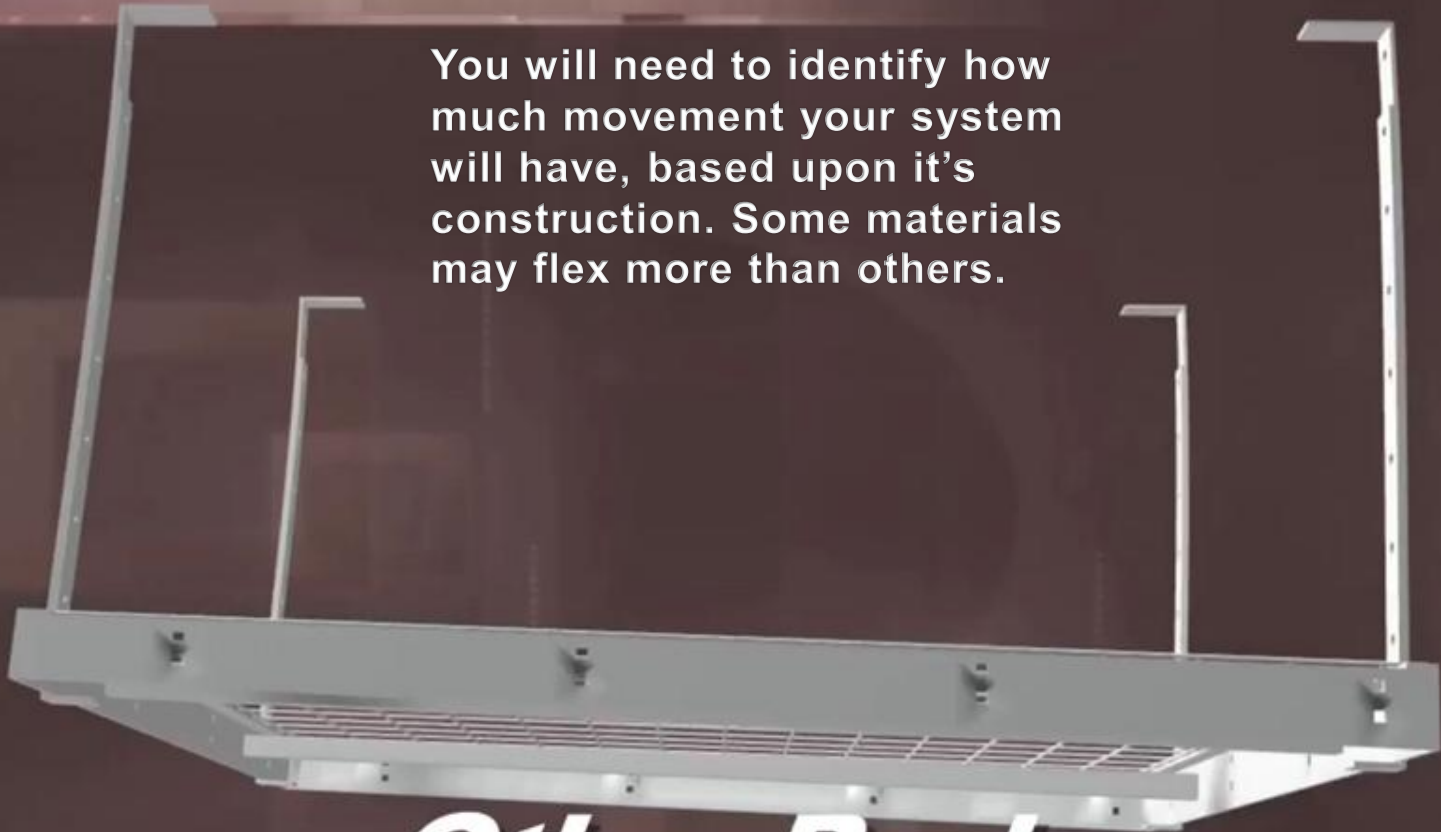

Exclusive

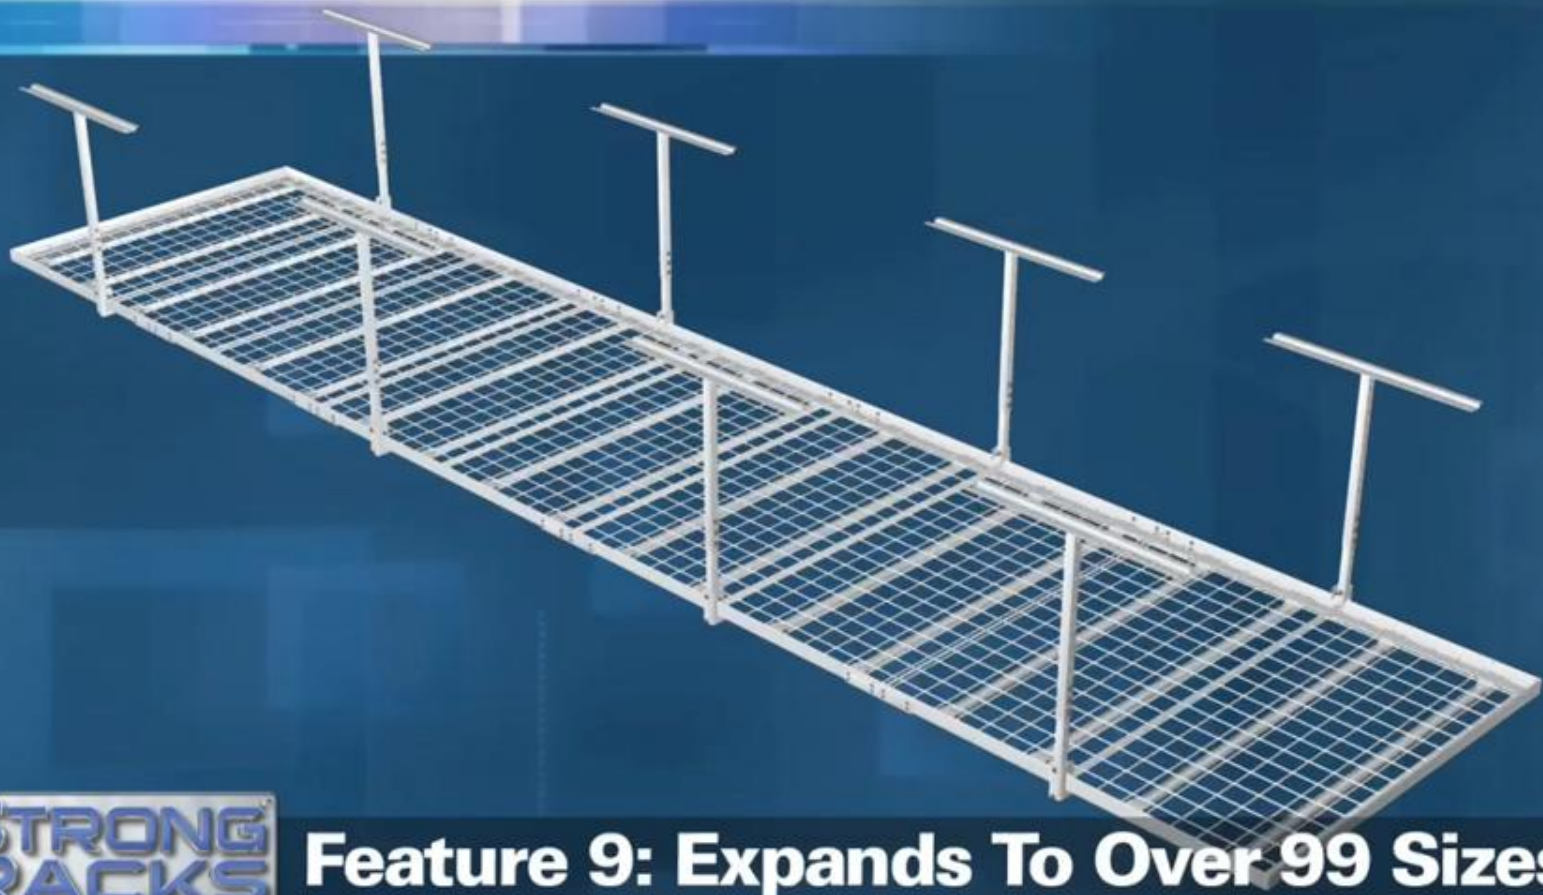

Our rail bracket converts into a Rail Wall Bracket for higher capacities and a safer way to diffuse the load across a total of four ceiling joists and two wall studs. With the unit secured into the wall studs, there is virtually no movement in the system.

You will need to identify how much movement your system will have, based upon it's construction. Some materials may flex more than others.
